

Gian Rusell E. Flores

BSCS 3-B

Operation Research Activity 4

Which projects should be implemented over the next 3 years, and what would be the projected total revenue?

Original Case (₱25M/year)

Selected Projects: B, C, and D

Projected Total Revenue:

$$40 + 20 + 15 = \text{₱}75 \text{ m} \quad \text{million}$$

If the available funds per year were increased to P30M/year, what projects would you recommend to be prioritized, and what would be the projected total revenue?

If Budget = ₱30M/year

Selected Projects: A, B, C, and D

Projected Total Revenue:

$$20 + 40 + 20 + 15 = \text{₱}95 \text{ m} \quad \text{million}$$

If the available funds per year were P25M/year and the five projects would have an equal revenue of P30M, what projects would you recommend to be prioritized, and what would be the projected total revenue?

If Budget = ₱25M/year & Equal Revenue (₱30M each)

Selected Projects: A, B, and C

Projected Total Revenue:

$$3 \times 30 = \text{₱}90 \text{ m} \quad \text{million}$$
